SKILLS

Languages

PHP TypeScript JavaScript SQL

Frameworks

Laravel Vue Inertia.js Tailwind CSS

Infrastructure

Docker Linux Nginx

Data & Tools

PostgreSQL MySQL Git GitHub Actions

EXPERIENCE

Oct 2019 - Present

Laravel · Vue · SQL

Software Developer

[SynergiTech Ltd.](#)

- Build and maintain Laravel and Vue features across production web applications.
- Work across backend services, frontend components, database queries, scheduled jobs, and CSV/PDF exports.
- Improve reporting workflows by replacing expensive live calculations with pre-aggregated statistics where appropriate.
- Debug complex production issues involving permissions, progress tracking, subscriptions, renewals, and data exports.
- Collaborate on requirements, implementation details, testing, deployment preparation, and ongoing maintenance.

EDUCATION

BSc (Hons) Software Engineering - ongoing

The Open University. Relevant modules include:

- Software Engineering
- Web, Mobile and Cloud Technologies
- Web Technologies
- Object-oriented Java Programming
- Algorithms, Data Structures and Computability
- Data Management and Analysis

INTERESTS

Technical interests

Developer tooling, language design, self-hosting, UI experimentation, game development, and practical automation.
